

# Tejas Networks

**Telecom Products for convergence of voice-based networks with data-dominated networks**

The company creates state-of-the art products and solutions in the telecommunications and optical networking arena. It was founded in 2000 by Sycamore, Dr. Gururaj Deshpande and a group of highly experienced Indian technocrats. Tejas develops software-differentiated optical networking products that provide high price/performance in their class, enabling carriers to maximize revenue-generating services while optimizing their overall network costs
